- Can we save irradiation (diagnostic) from our patients?
- Is there really a rise in the incidence of Autism?
- Is it justified to perform brain ultrasound in any fetus in the third trimester?
- Cannabis and epilepsy

Welcome Message

Following the enormous success of the 1st Congress on Controversies in Pediatrics (CoPedia), which took place in April 2014 in Prague, Czech Republic, we invite you to attend and actively participate in the next congress, to be held in Budapest, Hungary, April 16-19, 2015.

The field of Pediatrics is witnessing an enormous expansion in clinical and basic data. Conferences are becoming more and more informative and there is limited time for thorough discussion.

The aim of CoPedia Congresses is to search for best fit answers and to reach current conclusions to the ongoing debates in the field through evidence-based medicine.

The CoPedia scientific program deals with the most burning questions of our profession and provides an effective forum for discussing and debating, by allowing ample time for speaker-audience discussions.

The 2nd Congress aims to bridge the gap between the expansion of information and its consolidation into clinical practice.

We look forward to welcoming you to Budapest in the year 2015.

Sincerely

Prof. Ami Ballin
On behalf of CoPedia Chairpersons

Key Dates

Call for abstracts

Deadline for abstracts submission

January 12, 2015

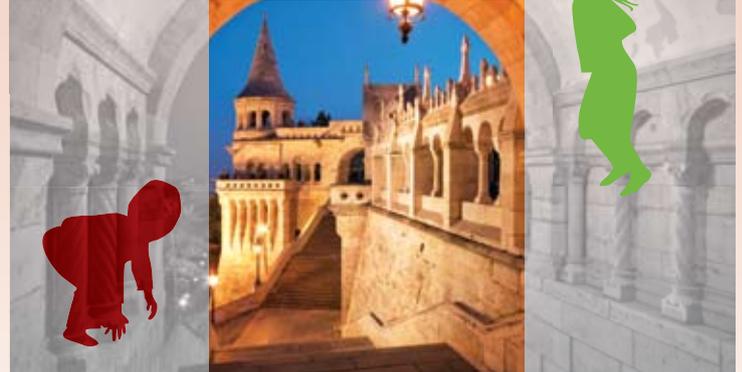

Registration

Deadline for early registration

January 23, 2015

Facts about CoPedia

- An academic gathering for physicians and scientists
- Devoted to clinical controversies
- Based on debates and discussions
- Discussing controversial issues in a critical manner
